PROFILE

As the founder of Fluent Studio, I develop web and Windows software and manage the studio's organizational and administrative work. I focus on AI-assisted software development, automation and quality assurance, connecting technical, product and operational decisions with systems thinking.

TECHNICAL EXPERIENCE

Fluent Studio | Founder and Software Developer · 04/2026 – present

- Built and published the studio website with Next.js, React and TypeScript on Vercel, with Supabase integration.
- Developing FluentOverlay, a native Windows overlay for app-specific shortcuts and workflows (C#, WinUI 3).
- Established AI-assisted workflows for architecture, implementation, tests and documentation; used Vitest, ESLint and Prettier for quality checks.

ECommeleon | Junior Developer Intern · 03/2023 – 05/2023

- Added frontend and backend features to an existing Laravel application (PHP, MySQL, Bootstrap, CSS, jQuery).

SELECTED PROJECT

Kollektiv Spinnen | Festival Platform · 08/2025

- Built a festival platform for approximately 200 guests with an interactive timetable, event filters and multilingual content.
- Implemented admin access, ticketing, validation and live data with React, TypeScript and Supabase/PostgreSQL.

ADDITIONAL RESPONSIBILITY

Fusion Festival: Bar shift lead for 12 people in 2025; bar organization for approximately 60 people in 2025–2026. Independently planned seven-day shifts and handled daily revenue accounting above €20,000.

TECHNICAL SKILLS

Web React · Next.js · TypeScript · CSS/Tailwind

Data and backend Supabase/PostgreSQL · Node.js/Express · MySQL · Laravel

Windows and quality C# · WinUI 3 · Vitest · Git/GitHub · ESLint

AI and systems Claude Code · Codex · Cursor · agentic workflows · MCP · prompt and context architecture · systems thinking
